## EDUCATION

---

### Technical Education Copenhagen

*Data and Communication, Data technician specializing in programming*

Copenhagen, Denmark

*Aug. 2022 – Present*

*Completion July 2027*

## EXPERIENCE

---

### Web Developer, Intern

*CAS Training*

May 2023 – June 2023

*Madrid, Spain*

- Completed **Erasmus+ internship** with CAS Training, developing and optimizing their **cursoscastraining.es** website using **WordPress** and **HTML/CSS**.
- Proposed and implemented **solutions to business challenges**, such as improving interactive filtering to enhance user engagement based on client feedback.

## PROJECTS

---

### Dating App | C#, ASP.NET Core, Entity Framework, SQL

June 2024

- Developed a full-stack web application using **ASP.NET Core** and **Entity Framework**, integrating with an **SQL database** for efficient user data management, resulting in a scalable application with profile matching and real-time messaging features.
- Implemented **CRUD** operations, secure **authentication & authorization** and responsive UI with TailwindCSS, providing an engaging user experience.

### PinoyKusina | JavaScript, HTML/CSS

May 2024

- Developed a **responsive** and **interactive** food ordering platform using **JavaScript**, **HTML/CSS**, featuring **real-time order updates** and a **dynamic menu interface**.

### Unity Games | Unity, C#

- Developed Flappy Bird and Pong game clones. Showcased at several school events with over **100 participants** from various schools, to inspire potential new software developers.
