## EDUCATION

---

### Technical Education Copenhagen

*Data and Communication, Data technician specializing in programming*

Copenhagen, Denmark

*Aug. 2022 – Present*

*Completion July 2027*

## EXPERIENCE

---

### Web Developer, Intern

*CAS Training*

May 2023 – June 2023

*Madrid, Spain*

- Completed **Erasmus+ internship** with CAS Training in Madrid, contributing to the development and optimization of their **cursoscastraining.es** website, improving user engagement.
- Designed, optimized, and implemented **interactive filtering** on the cursoscastraining.es website using **WordPress, HTML/CSS**, resulting in an increase in user interaction and a smoother user experience.

## PROJECTS

---

### Dating App | C#, ASP.NET, Entity Framework, SQL

June 2024

- Developed a full-stack dating web application using **ASP.NET Core** and **Entity Framework**, integrating with an **SQL database** to handle user data efficiently, resulting in a scalable application with seamless data operations.
- Implemented **CRUD operations** and **secure authentication/authorization** mechanisms using cookies, ensuring user **data integrity** and providing a smooth login experience.

### Food Ordering Site | JavaScript, HTML/CSS

May 2024

- Developed a **responsive** and **interactive** food ordering platform using **JavaScript, HTML/CSS**, featuring **real-time order updates** and a **dynamic menu interface**.

### Unity Games | Unity, C#

December 2023

- Developed **Unity** versions of Flappy Bird and Ping Pong using **C#**, showcased at a school event with over 100 participants from various schools, receiving positive feedback for **gameplay mechanics** and **smooth functionality**.

## TECHNICAL SKILLS

---

**Programming Languages:** Proficient in C#, HTML/CSS, Familiar with JavaScript

**Frameworks:** Proficient in .NET, ASP.NET, Entity Framework, WordPress

**Database Management:** SQL Server

**Developer Tools:** Proficient in Git, VS Code, Visual Studio, Familiar with Docker, Unity
